

dsDNA Quantification Kits

Because 'roughly' is not a scientific unit

- Fast, accurate and reliable
- Highly specific for dsDNA (with little to no RNA, ssDNA, or contaminants interference)
- Available for both Microplate readers and Fluorometers
- Formulated for reliable storage at 4°C

Microplate	Broad Range	4-1000 ng
	High Sensitivity	0.2-100 ng
Fluorometer	Broad Range	4-2000 ng
	High Sensitivity	0.1-120 ng
